

\$999 Money Challenge

hundreds	tens	ones

Adapted from Debbie Diller

\$999 Money Challenge

Materials:

- Dollar bills (1's, 10's, and 100's)
- Place value mat
- Math talk card

Directions:

- 1) Each student reaches into the bag and removes three bills at a time.
- 2) They add up the amount they grabbed, and whoever has the most gets to keep both players' money.
- 3) Students state how much money they grabbed using the math talk card as a guide.
- 4) Each student keeps track of how much money he or she has collected by placing his/her dollar bills on a hundreds, tens, and ones mat, making exchanges whenever possible.
- 5) Play continues in this manner until someone gets \$999 or they use up all of the money.
- 6) Once the game ends, all money is returned to the bag and they play again.
