

# Battle with Bigger Numbers

Two-Digit Addition

# Battle with Bigger Numbers

## Materials:

- 40 two-digit numeral cards
- Dry erase boards and markers
- Calculator (optional)

## Directions:

- 1) The first child chooses 2 cards from the pile, adds them together mentally, and records his or her thinking on the dry erase board to show his or her sum for Battle.
- 2) The other child checks to be sure the computation is correct. (A calculator may be used.)
- 3) Then the other child chooses 2 cards and does the same thing. His partner checks his work.
- 4) Whoever has the biggest sum wins and keeps all four cards. Play continues until all of the cards have been used. The player with the most cards wins.

## Variation:

For subtraction, whoever has the biggest number (difference) wins the hand.
