

# Building Arrays

# Building Arrays

## Materials:

- Dice (1 - 6, 0 - 9, or 1 - 10)
- Counters

## Directions:

- 1) Each player rolls the die 2 times. The first number the player rolls tells how many rows to make in the array. The second number the player rolls tells how many counters to put in each row of the array.
- 2) Players draw each array they make.
- 3) Players record how many rows, how many counters in each row, and how many counters in all for each array they make.

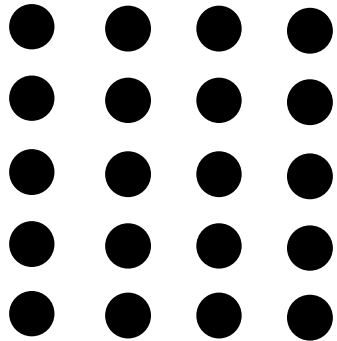

Name \_\_\_\_\_

## Building Arrays

Recording Sheet

**Directions:** Draw the array you made. Write the number of rows, the number of counters in each row, and the total number of counters in the array.

Example: 5 rows, 4 counters in each row  
Total number of counters is 20.
