

Ladybug Shake and Spill

Ladybug Shake and Spill

Materials:

- Two-sided counters
- Ladybug mat
- Recording sheet

Directions:

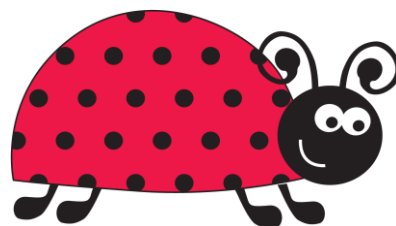

This activity can be played either individually or with a partner.

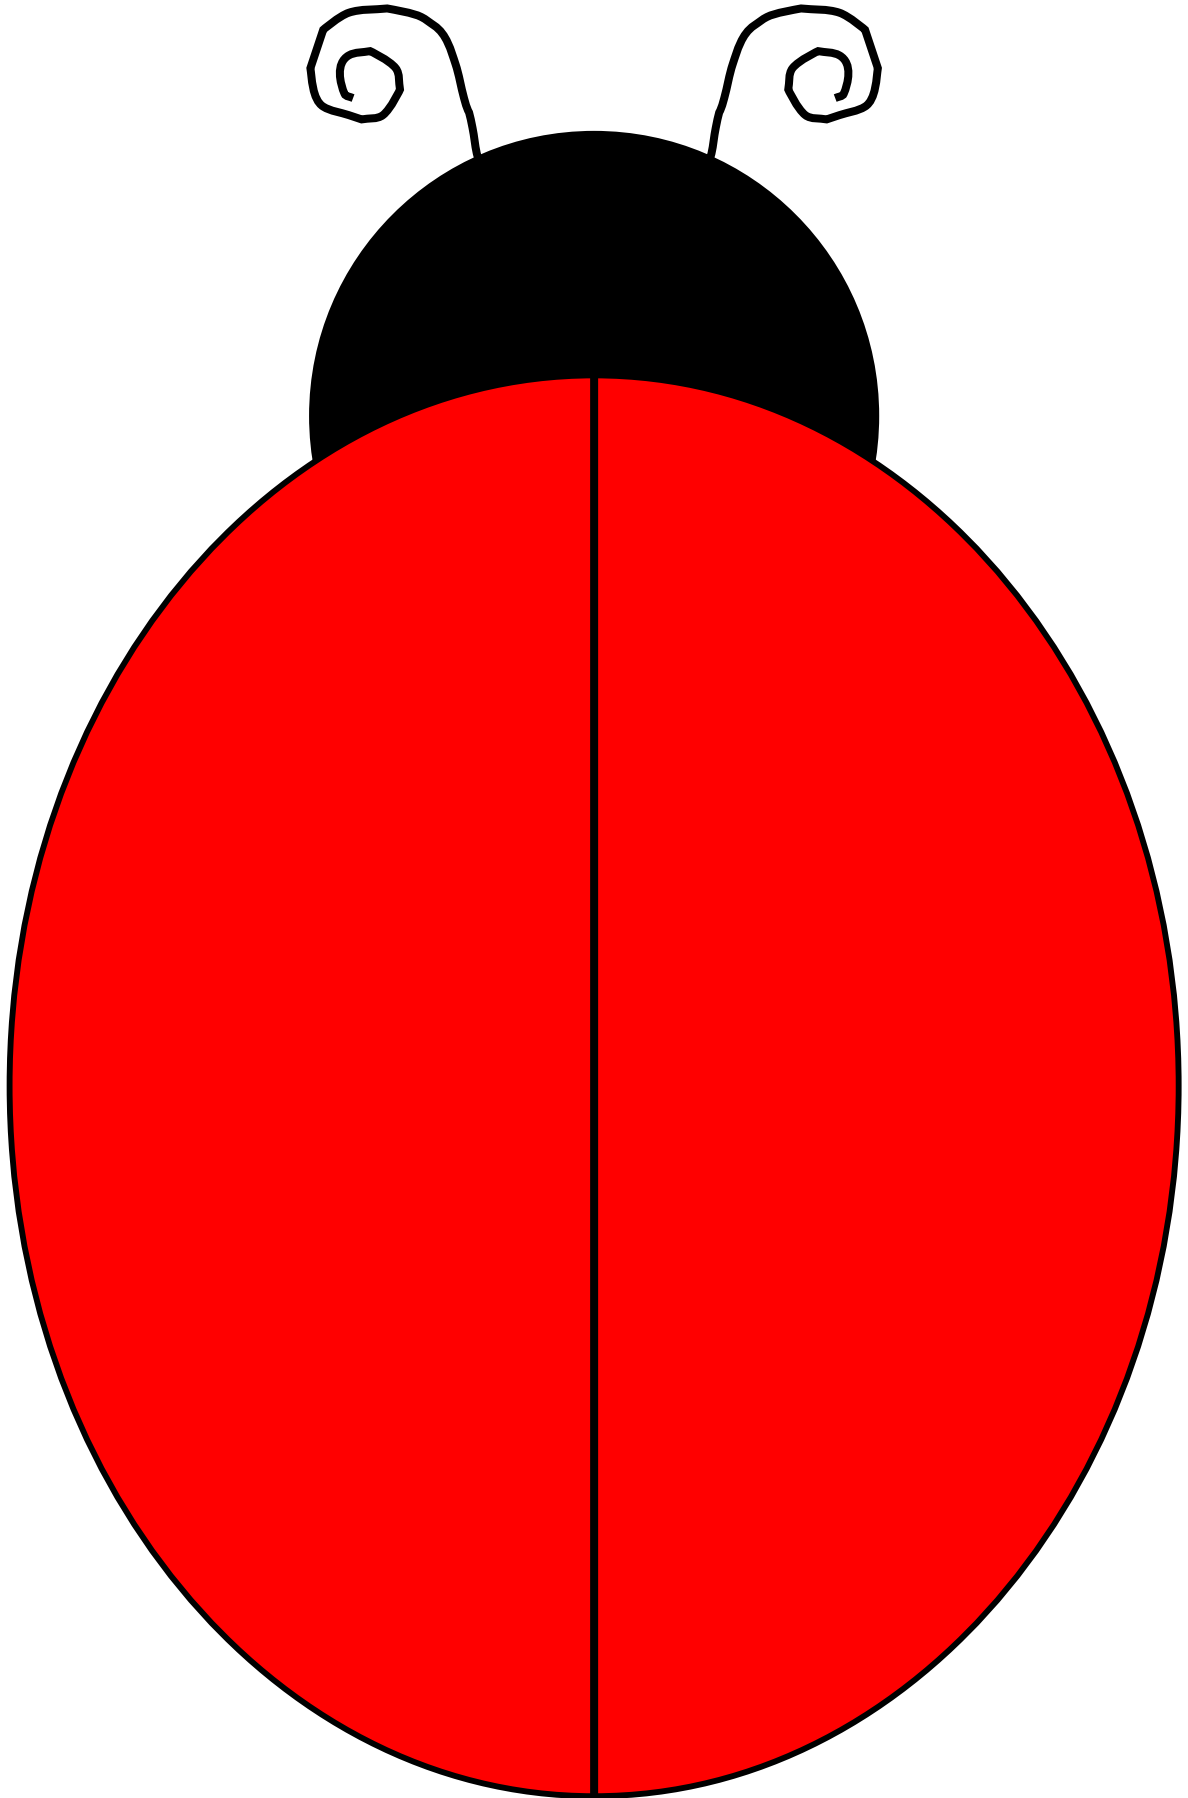

The student will

- Choose a target number and write it on his recording sheet.
- Put the target number's amount of counters into the cup and shake the cup.
- Spill the contents of the cup onto the mat.
- Put the two colors of counters on different wings of the ladybug. Ex. The red counters are moved onto the left wing, and the yellow counters are moved onto the right wing of the ladybug.
- Record the numbers on the recording sheet as an equation.

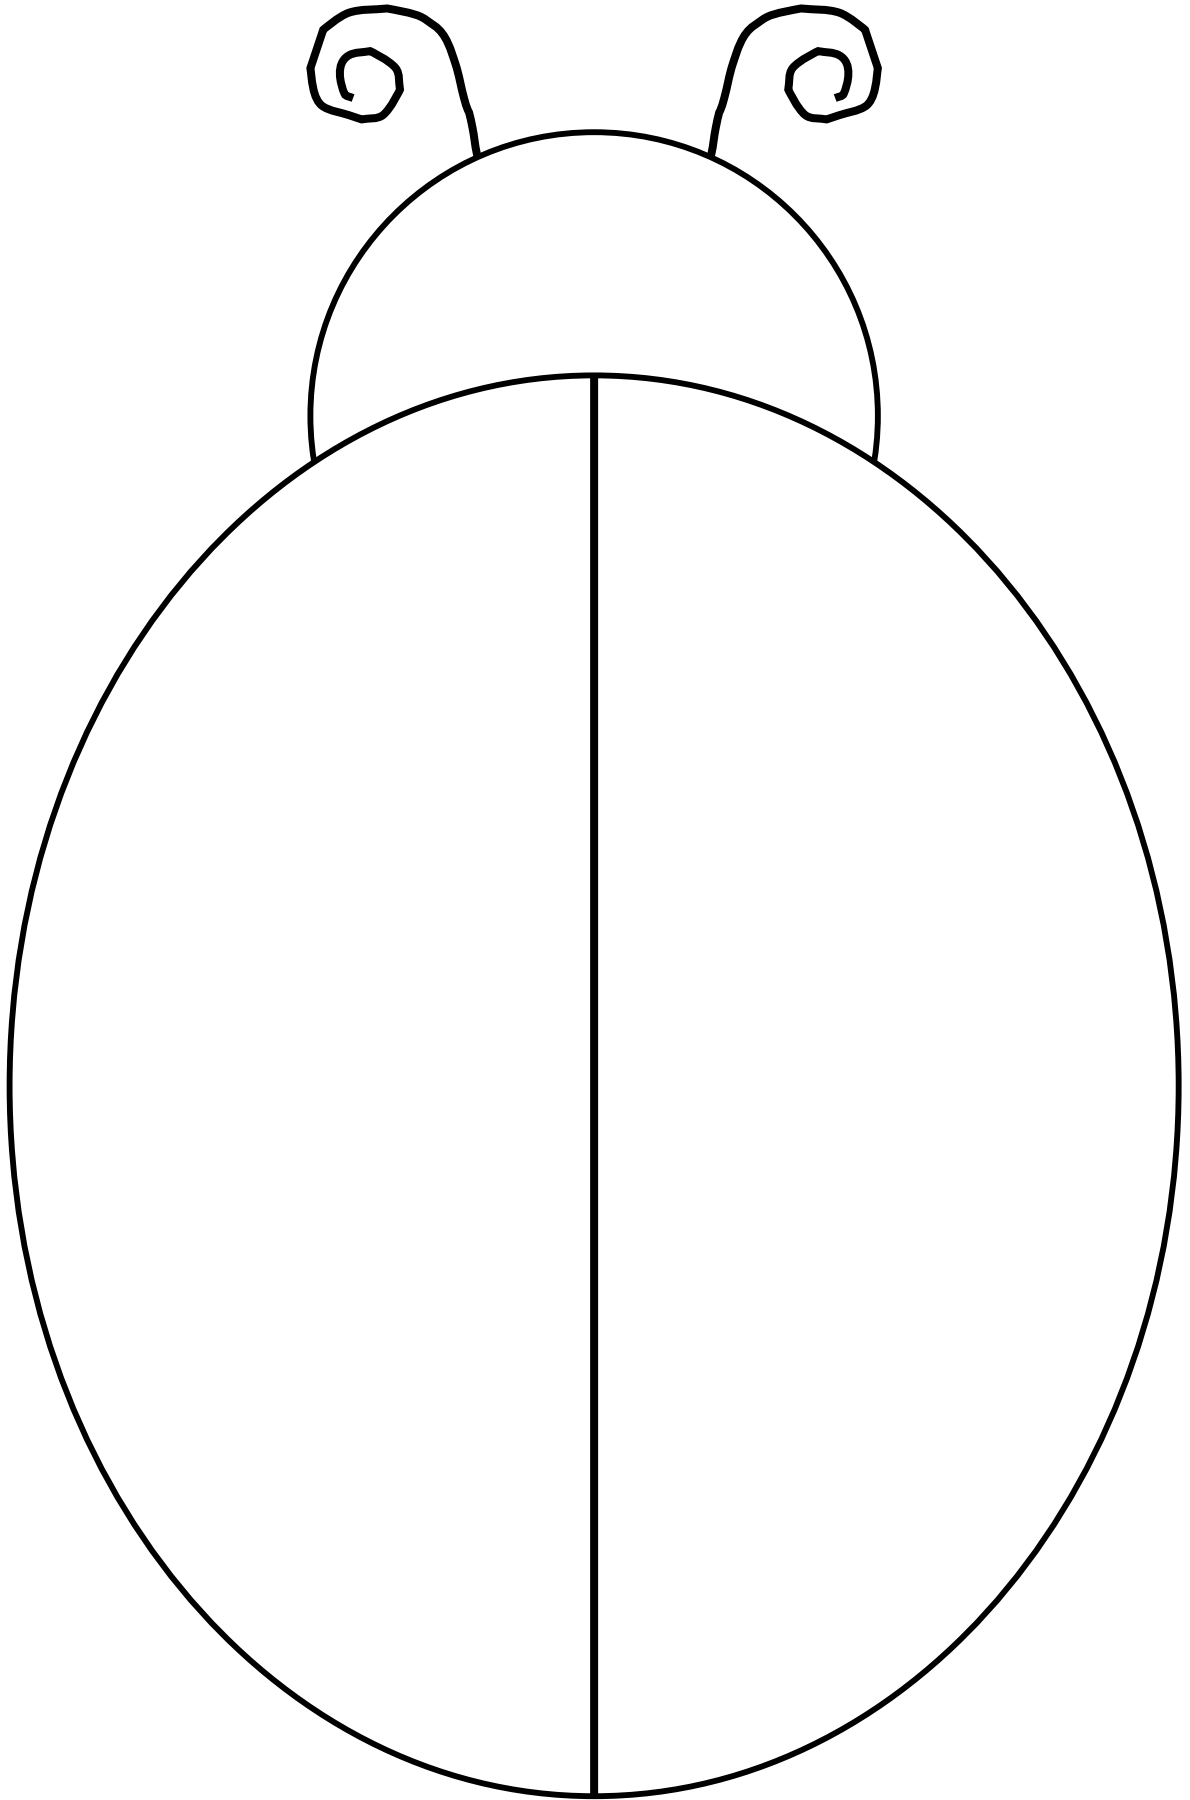

Differentiation:

The game is differentiated by the target number. For example, some students may be working on the number 3 while others are working on facts for 10.
