

Make a Flat (Hundred)

Make a Flat (Hundred)

Materials:

- Numbered dice (1 or 2 depending on the needs of the students)
- Base-ten blocks
- Place value mats

Directions:

- 1) This is played the same as Collect and Count to 100, except base-ten manipulatives are used.
- 2) Partner one rolls the dice and counts out that many one-blocks. (When a quantity over ten is reached, the child trades the 10 one-blocks for a ten-rod.) Using the math talk card, the student states how many groups of ten and leftover ones have been collected in all.
- 3) Partner two takes his or her turn.
- 4) Play continues until someone is able to trade 10 ten-rods for a hundreds-flat.

Variation:

This can be played using pennies, dimes, and a dollar bill or coin.
