# Missing Number with Multiplication

## Materials:

- Sets of number cards (0 - 10)
- Gameboards (if laminated, dry erase markers are needed)

## Directions:

- 1) With a partner, shuffle the number cards and make a facedown stack of them between the two players.
- 2) Take turns turning over the top card. Check to see if you can use the number to complete an equation on your side of the board. If you turn over the wild card, you may use it for any number.
- 3) If you can use the number, keep the card and write the number in the correct empty box on your board. If you cannot use the number, put it in the discard pile and your turn is over.
- 4) Continue playing until one player's board is completely filled. The first player to fill their board is the winner.
