

Multiplying Multiples of 10

$$3 \times 10 = 30$$

$$30 \times 6 = 180$$

Multiplying Multiples of 10

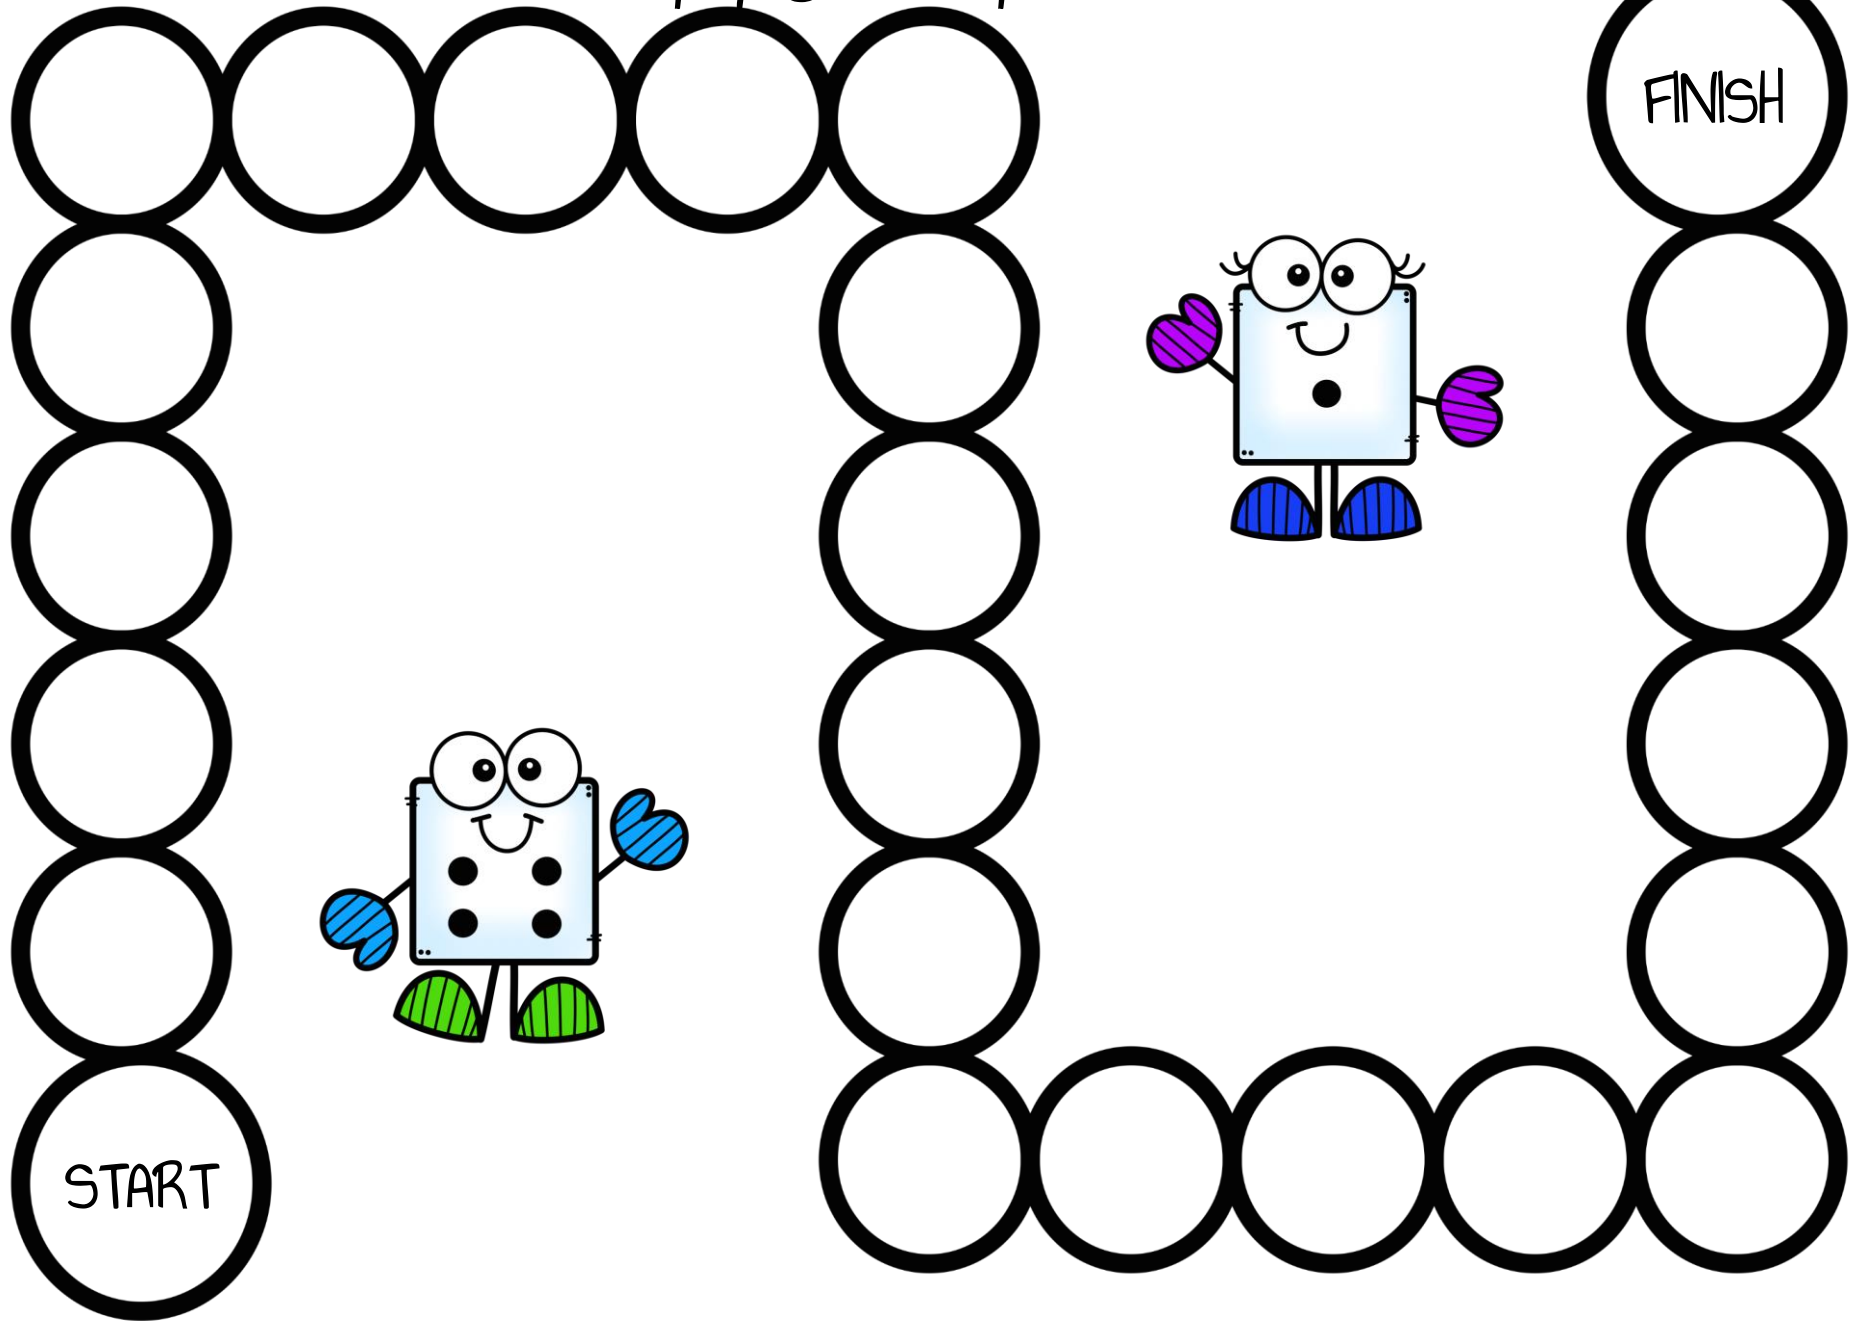

Materials:

- Game board
- 2 counters (1 for each player)
- 2 dice

Directions:

- 1) Place your counters on START.
- 2) Player 1 rolls the die once and multiplies that number by 10 to make it a multiple of 10. Player 1 rolls again to determine the other factor.
Example: Tammy rolls a 4. $4 \times 10 = 40$ Tammy rolls again and gets a 3. Her factors are 40 and 3.
- 3) Player 1 multiplies the two factors, states the equation, and identifies the product.
 $40 \times 3 = 120$. 120 is the product of 40 and 3.
- 4) Player 2 takes a turn, repeating the same procedure.
- 5) The player with the greatest product moves his/her counter one space on the game board.
- 6) The first player to reach FINISH wins.
