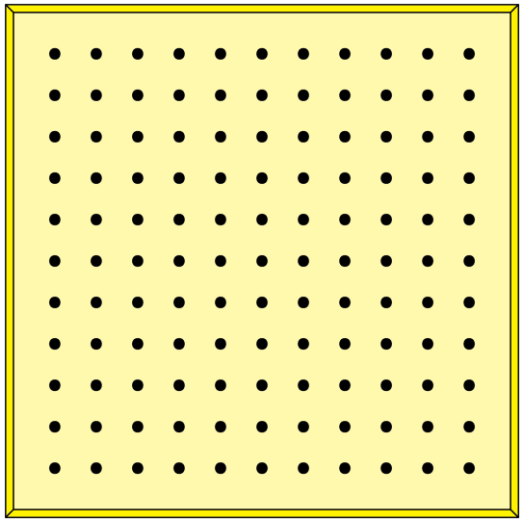
Quadrilateral Creation



Source: K - 5 Math Teaching Resources

Quadrilateral Creation

Materials:

- Geoboards
- Rubber bands
- Geoboard recording paper

Directions:

1) Use the criteria below to create quadrilaterals on the geoboard.
2) Use a ruler to measure the sides of the shape if needed.
3) Draw each shape on geoboard paper and identify it.

Criteria:

- Four sides of equal length; four right angles
- Four sides; opposite sides equal, four right angles
- Four sides of equal length; opposite sides parallel; no right angles
- Four sides; exactly two sides parallel
- Four sides; two pairs with sides of equal length; no parallel sides
- Four sides; no sides parallel; no sides perpendicular
