

What's My Number?

My number is 6.

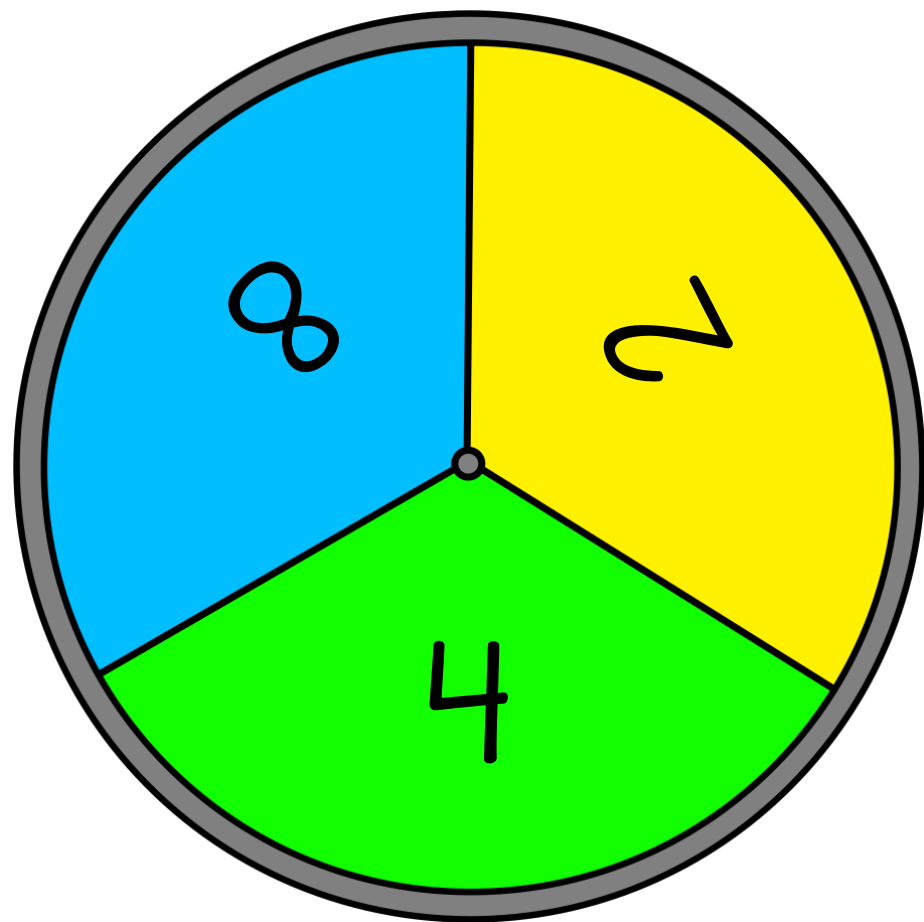

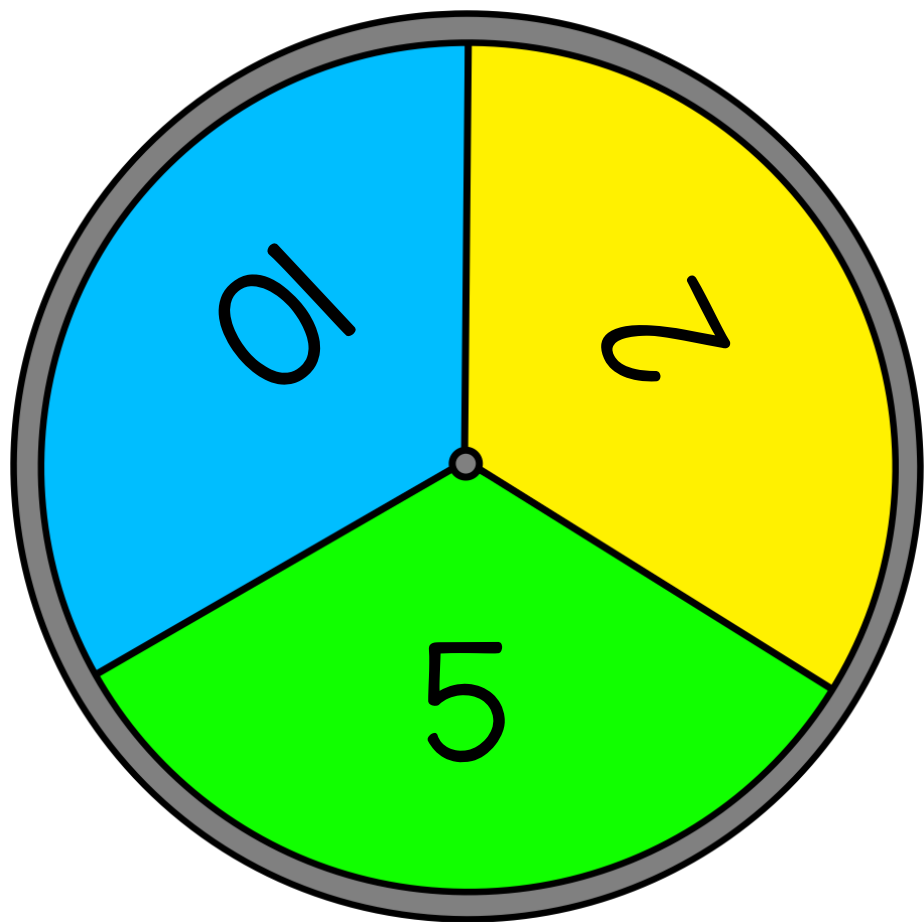

Missing Number with Multiplication

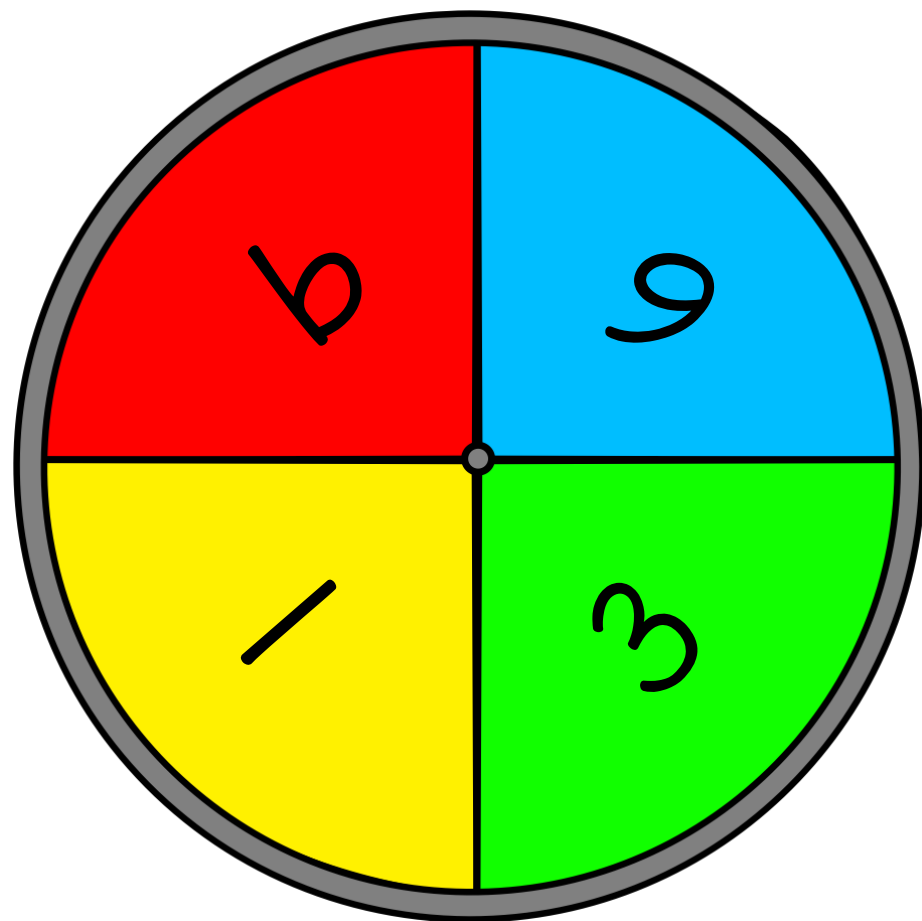

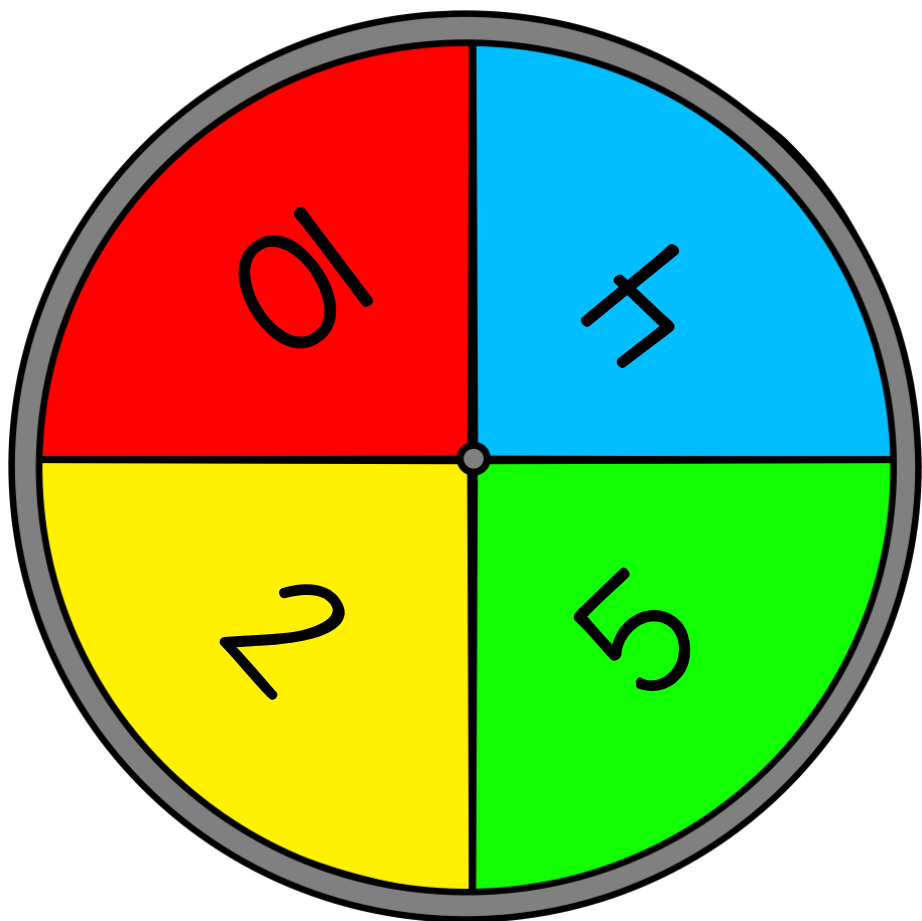

Materials:

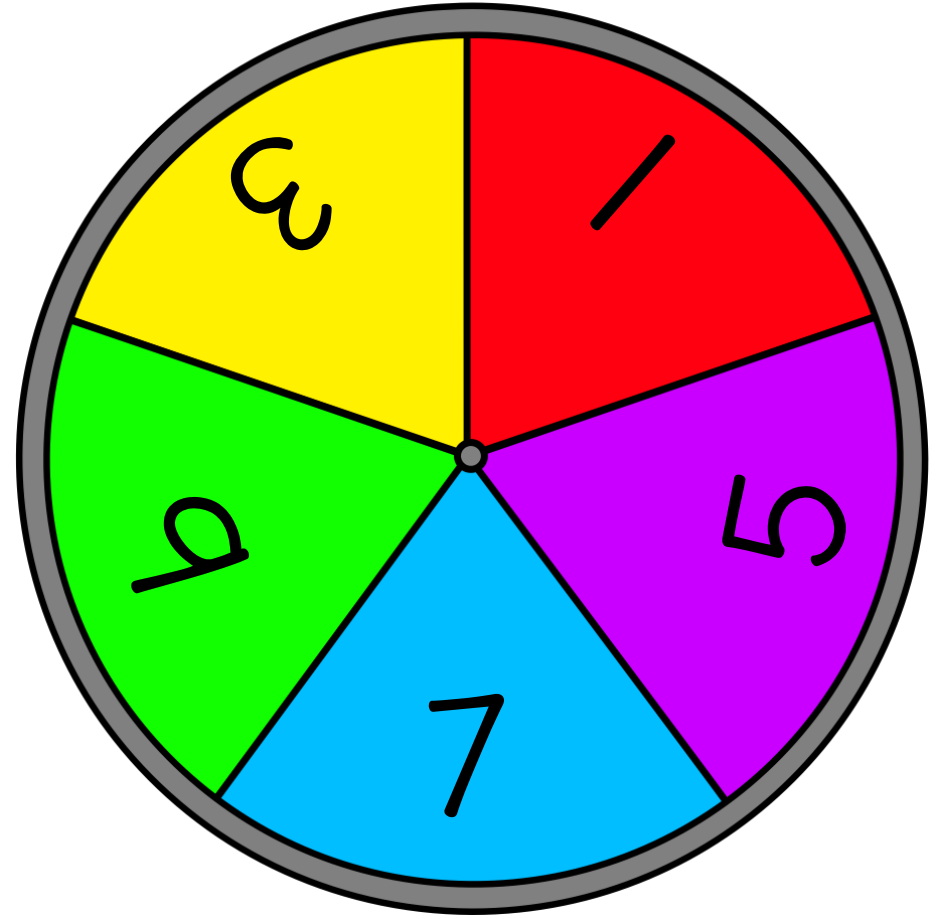

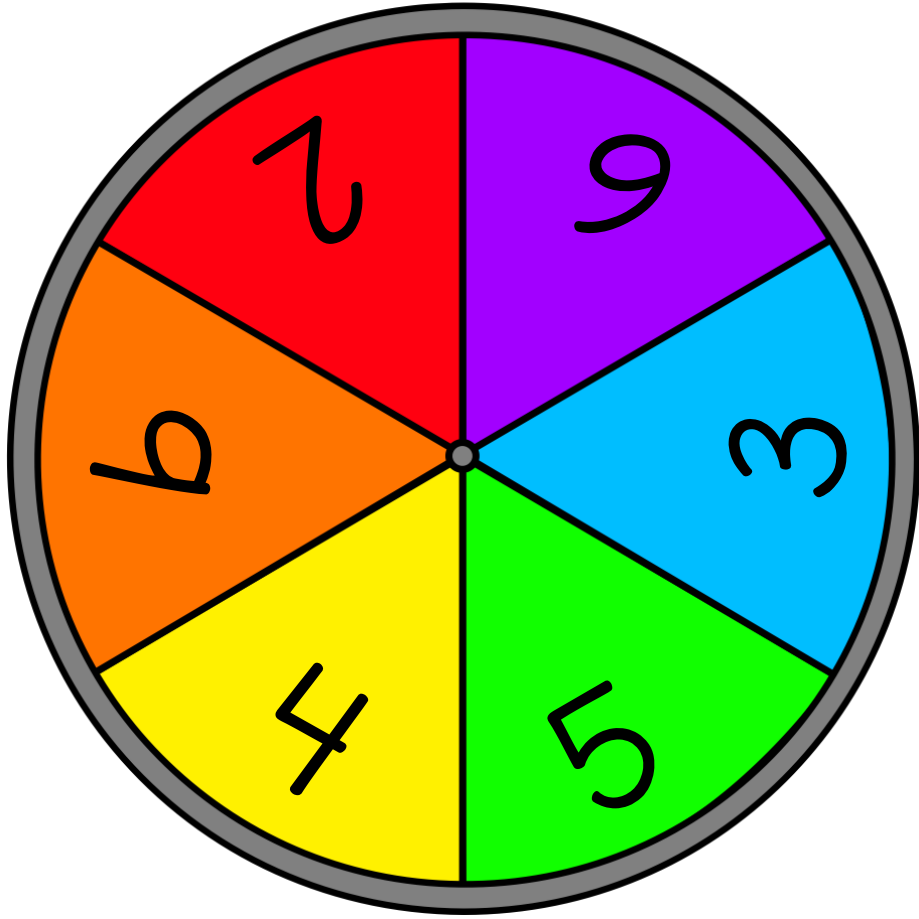

- Number cards (0 - 10)
- Spinners

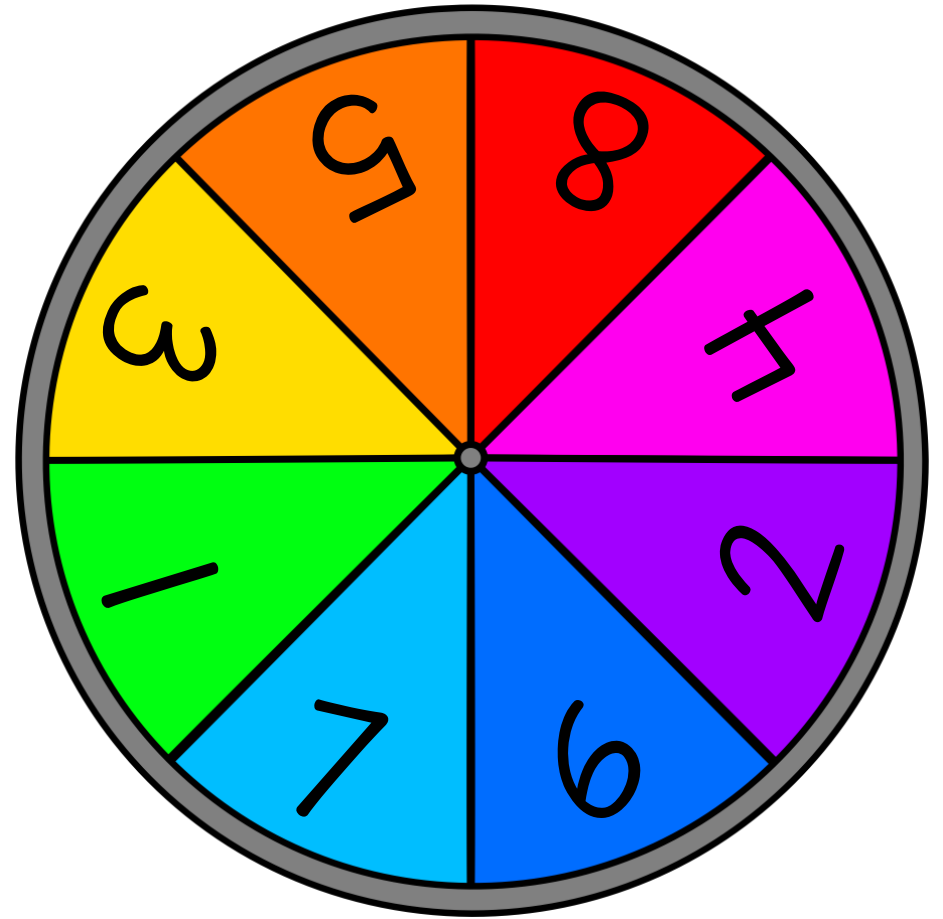

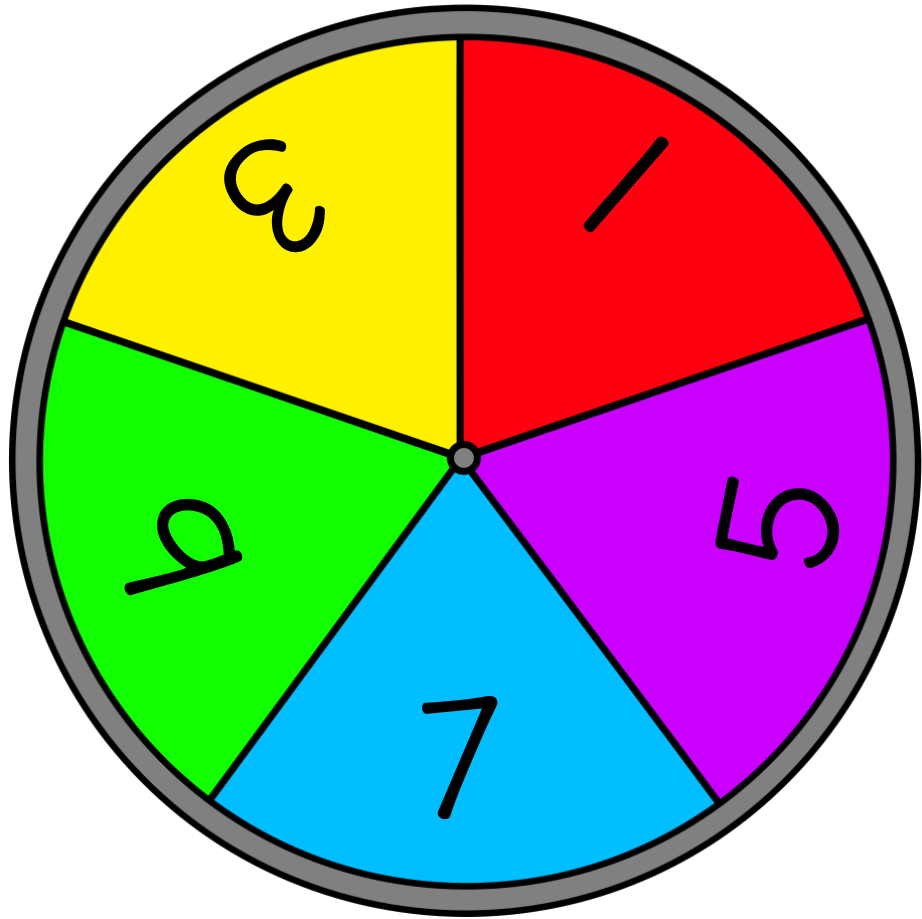

Directions:

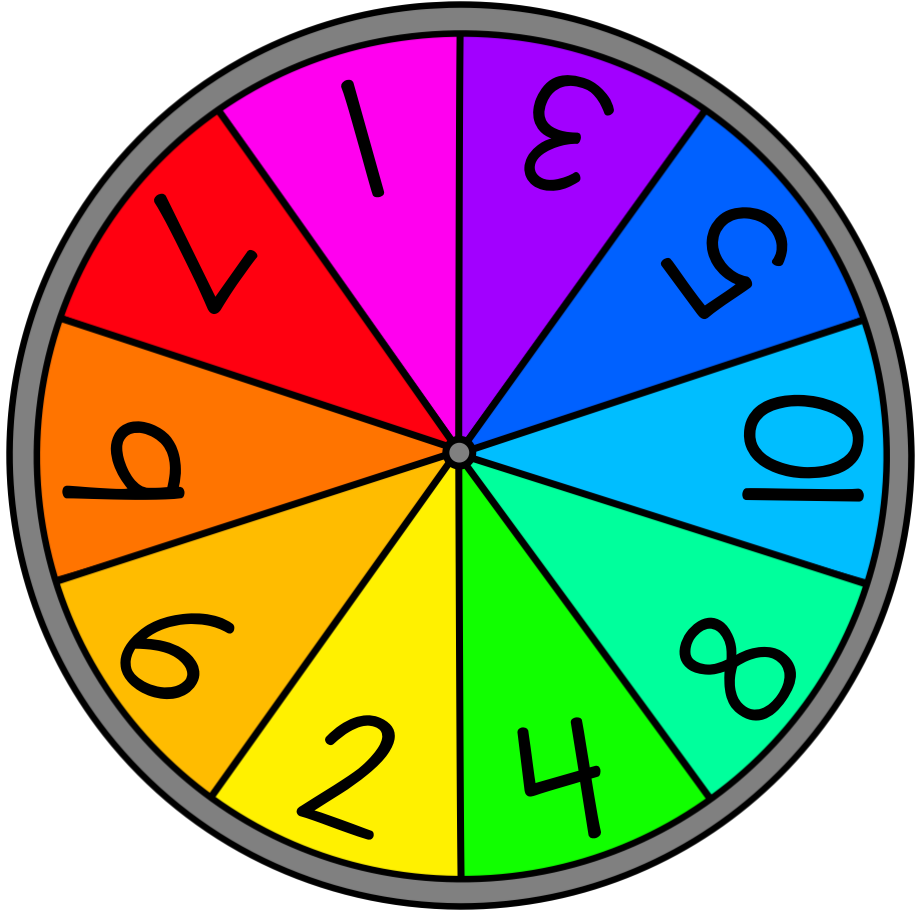

- 1) The shortest player goes first.
- 2) **Without looking**, player 1 picks up a card and holds the card up on his/her forehead.
- 3) Player 2 spins the spinner, multiplies player 1's number by the number the spinner lands on, and says the product. (e.g., spinner lands on 2, player 1's card is 4, player 2 says 8 because $2 \times 4 = 8$)
- 4) Player 1 must tell player 2 what number is on his/her card. If correct, he/she scores a point.
- 5) The first player to score 15 points wins.
