

# Drawing, Estimating, and Measuring Angles

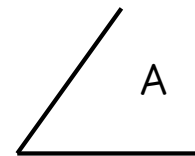

# Drawing, Estimating, and Measuring Angles

## Materials:

- Ruler
- Protractor
- Paper to draw the angles on and the recording sheet

## Directions:

- 1) Use your ruler to draw 5 different angles that measure less than 180 degrees. Label each angle with a letter.
- 2) Predict the measure of each angle and record it on the recording sheet.
- 3) Use your protractor to measure an angle. Record your answer.
- 4) Find the difference between your estimate and the actual measurement.
- 5) Repeat with the other angles.
