

Multiplying a Whole Number by a Fraction

Task Cards

D

Use the model to help you multiply a whole number by a fraction.

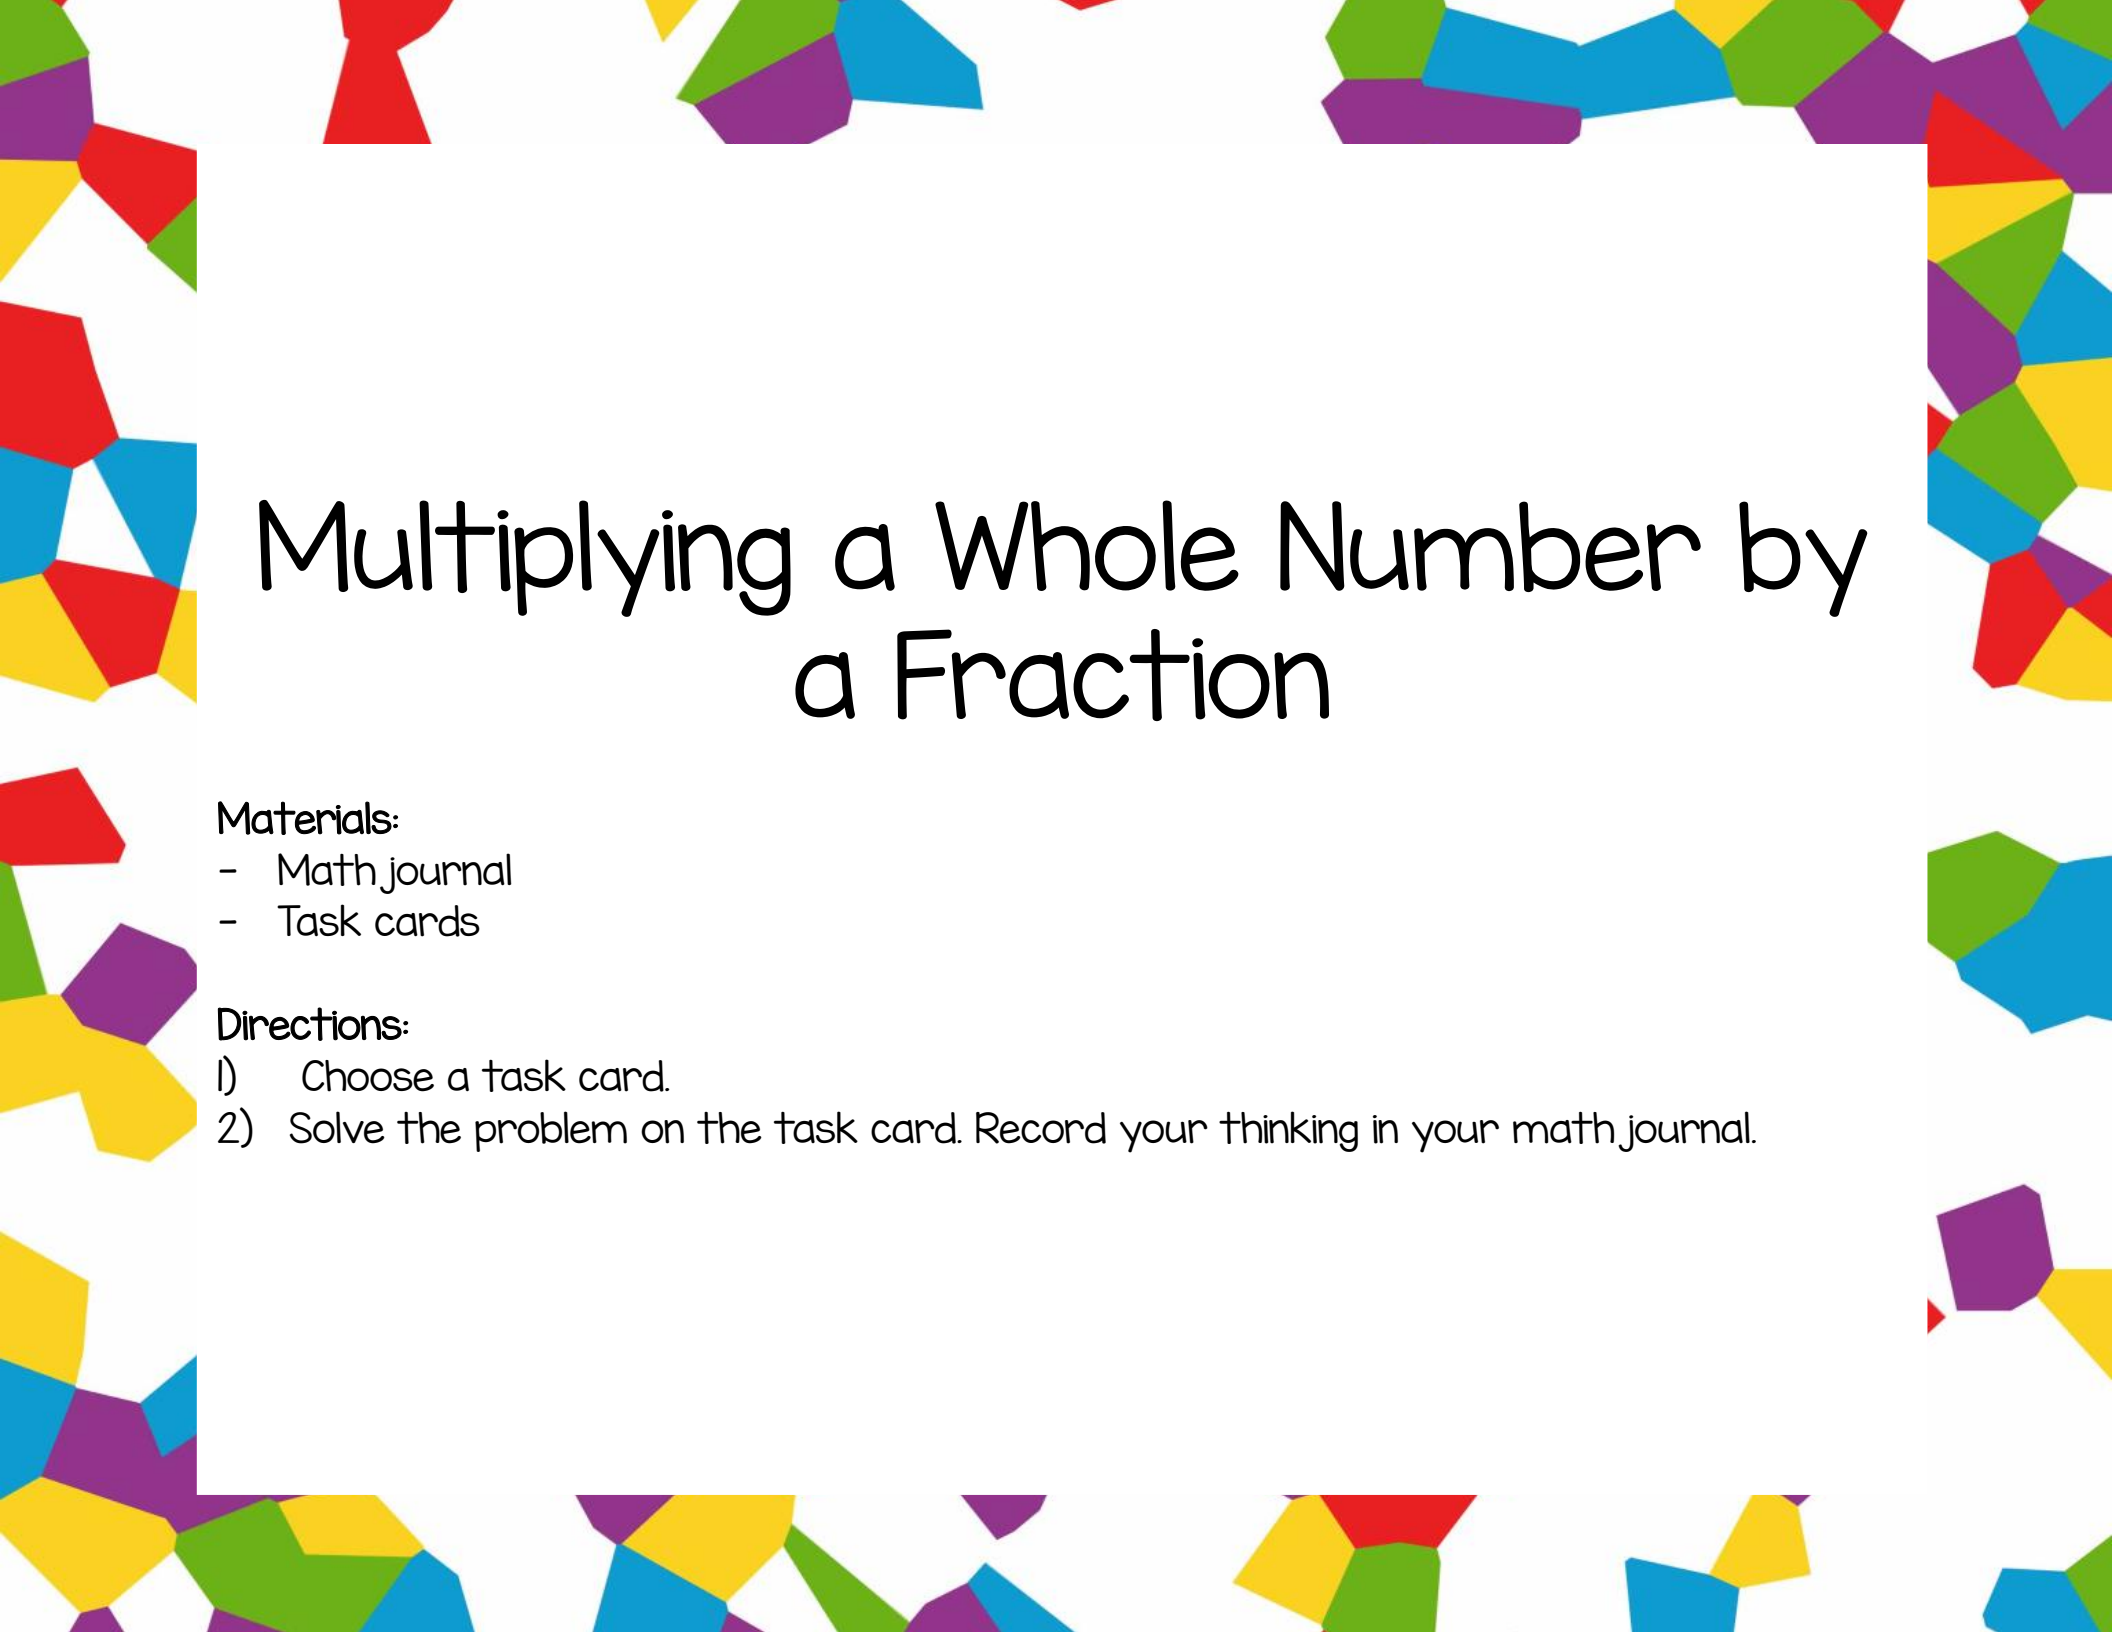

$6 \times \frac{2}{5} = \underline{\hspace{2cm}}$

X

Multiply the whole number by the fraction. Write the product as a fraction and as a mixed number, when possible.

$4 \times \frac{3}{12} = \underline{\hspace{2cm}}$

A decorative border composed of various colorful geometric shapes (triangles, quadrilaterals, pentagons, hexagons) in shades of red, yellow, green, blue, and purple, arranged in a pattern around the edges of the page.

Multiplying a Whole Number by a Fraction

Materials:

- Math journal
- Task cards

Directions:

- 1) Choose a task card.
- 2) Solve the problem on the task card. Record your thinking in your math journal.

A

Use the model to help you multiply a whole number by a fraction.

$$3 \times \frac{2}{3} = \text{-----}$$

B

Use the model to help you multiply a whole number by a fraction.

$$2 \times \frac{4}{6} = \text{-----}$$

C

Use the model to help you multiply a whole number by a fraction.

$$5 \times \frac{2}{10} = \text{-----}$$

D

Use the model to help you multiply a whole number by a fraction.

$$6 \times \frac{2}{5} = \text{-----}$$

E

Use the model to help you multiply a whole number by a fraction.

$$5 \times \frac{2}{3} = \underline{\hspace{2cm}}$$

F

Use the model to help you multiply a whole number by a fraction.

$$2 \times \frac{5}{12} = \underline{\hspace{2cm}}$$

G

Use the model to help you multiply a whole number by a fraction.

$$4 \times \frac{3}{6} = \underline{\hspace{2cm}}$$

H

Use the model to help you multiply a whole number by a fraction.

$$3 \times \frac{2}{4} = \underline{\hspace{2cm}}$$

I

Use the model to help you multiply a whole number by a fraction.

$$2 \times \frac{7}{10} = \underline{\hspace{2cm}}$$

J

Use the model to help you multiply a whole number by a fraction.

$$4 \times \frac{1}{3} = \underline{\hspace{2cm}}$$

K

Use the model to help you multiply a whole number by a fraction.

$$5 \times \frac{2}{12} = \underline{\hspace{2cm}}$$

L

Use the model to help you multiply a whole number by a fraction.

$$3 \times \frac{2}{6} = \underline{\hspace{2cm}}$$

M

Multiply the whole number by the fraction. Write the product as a fraction and as a mixed number, when possible.

$$3 \times \frac{4}{10} = \underline{\hspace{2cm}}$$

N

Multiply the whole number by the fraction. Write the product as a fraction and as a mixed number, when possible.

$$6 \times \frac{2}{8} = \underline{\hspace{2cm}}$$

O

Multiply the whole number by the fraction. Write the product as a fraction and as a mixed number, when possible.

$$7 \times \frac{2}{12} = \underline{\hspace{2cm}}$$

P

Multiply the whole number by the fraction. Write the product as a fraction and as a mixed number, when possible.

$$5 \times \frac{3}{10} = \underline{\hspace{2cm}}$$

Q

Multiply the whole number by the fraction. Write the product as a fraction and as a mixed number, when possible.

$$9 \times \frac{2}{10} = \underline{\hspace{2cm}}$$

R

Multiply the whole number by the fraction. Write the product as a fraction and as a mixed number, when possible.

$$8 \times \frac{2}{8} = \underline{\hspace{2cm}}$$

S

Multiply the whole number by the fraction. Write the product as a fraction and as a mixed number, when possible.

$$4 \times \frac{5}{6} = \underline{\hspace{2cm}}$$

T

Multiply the whole number by the fraction. Write the product as a fraction and as a mixed number, when possible.

$$2 \times \frac{7}{8} = \underline{\hspace{2cm}}$$

U

Multiply the whole number by the fraction. Write the product as a fraction and as a mixed number, when possible.

$$2 \times \frac{3}{10} = \underline{\hspace{2cm}}$$

V

Multiply the whole number by the fraction. Write the product as a fraction and as a mixed number, when possible.

$$5 \times \frac{4}{12} = \underline{\hspace{2cm}}$$

W

Multiply the whole number by the fraction. Write the product as a fraction and as a mixed number, when possible.

$$7 \times \frac{1}{10} = \underline{\hspace{2cm}}$$

X

Multiply the whole number by the fraction. Write the product as a fraction and as a mixed number, when possible.

$$4 \times \frac{3}{12} = \underline{\hspace{2cm}}$$
